The Embassy of Pakistan once again states categorically that reports appearing in the Press alleging transfer of nuclear weapons related components from China to Pakistan are completely unsubstantiated and totally false.

It is surprising that U.S officials who are being quoted anonymously have failed to address their attention and energy to the actual threat to non-proliferation in South Asia posed by India's ambitious nuclear weapons and missile programme. This once again demonstrates their discriminatory and inequitable approach to non-proliferation in South Asia.
